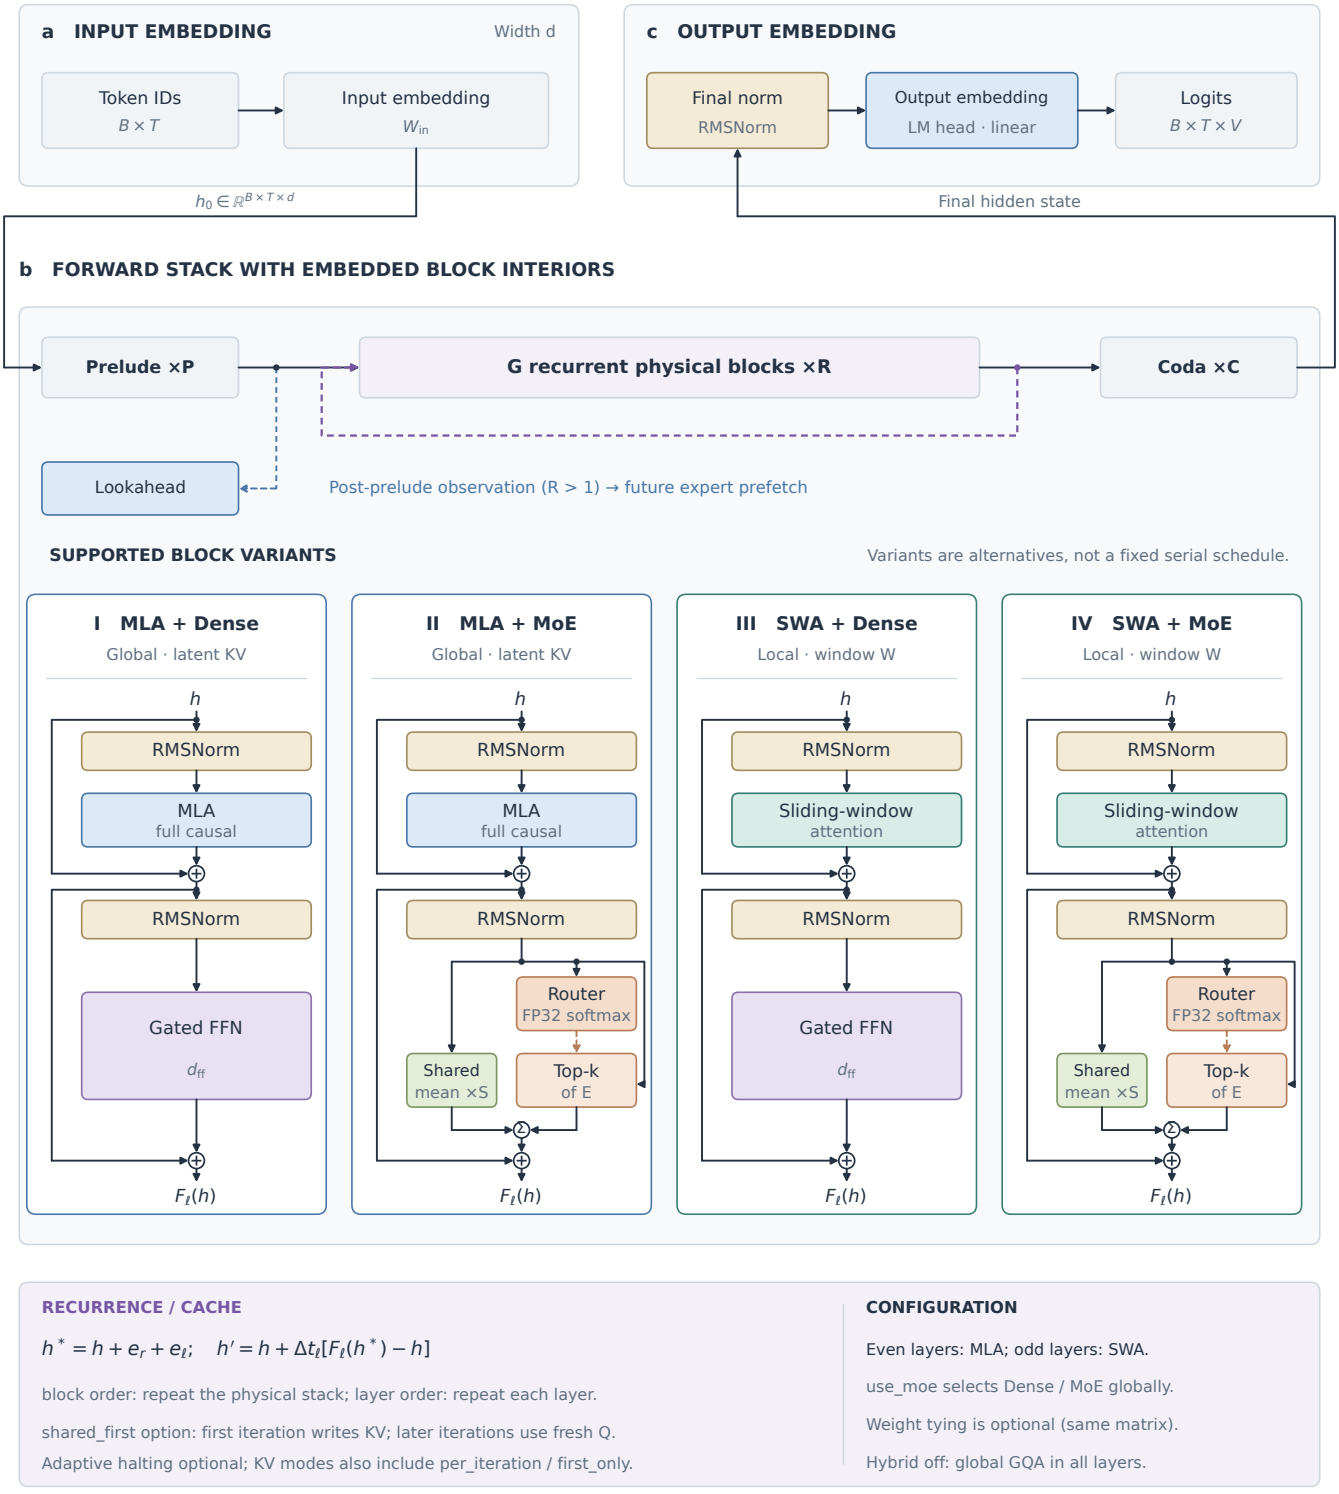
Chronos v3

Source-aligned configurable architecture



RECURRENCE / CACHE

$$h^* = h + e_r + e_\ell; \quad h' = h + \Delta t_\ell [F_\ell(h^*) - h]$$

block order: repeat the physical stack; layer order: repeat each layer.

shared_first option: first iteration writes KV; later iterations use fresh Q.

Adaptive halting optional; KV modes also include per_iteration / first_only.

CONFIGURATION

Even layers: MLA; odd layers: SWA.

use_moe selects Dense / MoE globally.

Weight tying is optional (same matrix).

Hybrid off: global GQA in all layers.

Norm · Global attention · Local attention · Dense FFN · Routed · Shared · Loop
